Eric Rangel

AI Implementation & Automation | Claude Skills, Agents & MCP | Python
North Riverside, IL | (708) 203-5210 | rangeleric776@gmail.com | linkedin.com/in/ericrangel776 | github.com/ericrangel776 | ericrangel776.github.io

EDUCATION

Dominican University, River Forest, IL - B.S. Computer Science **Expected May 2027**

- GPA 3.9/4.0 | Phi Theta Kappa Honor Society | Highest Level Transfer Merit Scholarship
- Coursework: Data Structures, Algorithm Analysis & Design, Database Design, Artificial Intelligence, Operating Systems, Data Science

EXPERIENCE

Datatelligent (analytics consultancy), Glen Ellyn, IL - *AI Implementation Intern* **Jan 2026 - Present**

- Gathered requirements and ran AI use-case discovery with the sales and delivery teams through stakeholder interviews and brainstorms; ranked automation opportunities in a value/effort prioritization workbook for the Growth team.
- Built and maintain a library of 17 Claude skills and plugins used in client work, including a versioned slide-deck plugin (v2.1), six meeting-notes and briefing skills over Fathom transcripts, and a skill-auditing agent that caught real client data in sample files before sharing; cut one skill's runtime from ~4 to ~1.5 min.
- Automated recurring reports with human-in-the-loop agent workflows: a HubSpot pipeline-report skill that drafts reports for human review before sending, and a PDF-to-Excel pipeline that extracted thousands of enrollment rows, with an agent validating the script's output (it caught a column the script missed).
- Built a browser-agent pipeline (Claude in Chrome) that pulls accreditation signals for ~1,000 higher-ed institutions and automatically matches them to IPEDS data; proved it on a 15-20-signal pilot, then turned a manual review into a ~30-minute rerunnable workflow delivering Excel lead lists.
- Led company AI rollouts: wrote the proposal that launched the Claude Team plan (approved the same day) and onboarded the first ~11 users; took an AI notetaker (Fathom) from vendor trial to 21 shared client-meeting recordings per week through one-on-one coaching.
- Planned and reported the AI initiative to the CEO through a project plan, tracker and 20+ weekly reports flagging risks and decisions; wrote 20+ guides, integration security audits (HubSpot, Slack, Microsoft 365) and a hands-on Claude workshop with a facilitator guide.

North Riverside Public Library, North Riverside, IL - *Circulation Clerk & Tech Expert* **Jan 2024 - Jan 2026**

- Troubleshot patron hardware and software issues as the branch's tech go-to, and used the SWAN consortium system for circulation and patron account tasks.

PROJECTS

RL Snake Agent | Python, PyTorch, Gymnasium, Stable-Baselines3 | github.com/ericrangel776/rl-snake-agent

- Trained agents to play Snake from reward signals alone; built a DQN from scratch and compared it with PPO across three reward-shaping strategies, with the best PPO agent peaking at ~46 pellets per episode vs. a 15-pellet success bar.

Study Pet (PWA) | JavaScript, Service Workers, Playwright, GitHub Actions, Claude Code | ericrangel776.github.io/study-pet

- Shipped an installable, offline-first web app with procedurally generated pixel-art pets and serverless device transfer via compressed links and QR codes; ~150 unit and browser tests gate every deploy.

ExpenseTracker | C#, ASP.NET Core 8 MVC, EF Core, SQL Server | github.com/ericrangel776/expense-tracker

- Built a full-stack finance tracker with transaction CRUD, server-side validation, CSRF protection and a live chart dashboard.

SKILLS

- **AI Implementation:** requirements gathering, use-case discovery and prioritization, stakeholder interviews, technical documentation, user onboarding, change management
- **AI & Agents:** Claude Code, Claude projects, skills and connectors (MCP), Claude in Chrome, agentic workflows, human-in-the-loop design, prompt engineering, PyTorch, Stable-Baselines3
- **Languages:** Python, JavaScript, C#, SQL, Java, HTML/CSS
- **Platforms & Tools:** Microsoft 365, SharePoint, HubSpot, ASP.NET Core MVC, EF Core, SQL Server, Git, GitHub Actions, Playwright

CERTIFICATIONS

DeepLearning.AI - AI coursework: LangChain for LLM Apps, Production RAG, LLMOps, Automated Testing for LLMs **2026**
