SKILLS

- **AI & Machine Learning:** Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Prompt Engineering, Agentic Workflows, Vector Embeddings.
- **Frameworks & Libraries:** LangChain (LCEL), OpenAI API, Vision Language Models (VLM), Agentic Document Extraction (ADE).
- **Engineering & Ops:** LLMOps, CI/CD (CircleCI), Automated Testing (Model-graded evaluation), SQL Server, Git, Linux (CLI).
- **Software Development:** Python, C#, Java, JavaScript, ASP.NET Core MVC, HTML/CSS, PHP, SSMS.

EDUCATION

Dominican University, River Forest - Bachelor of Science - Computer Science

GRAD DATE - MAY 2027

- **GPA: 3.9/4.0** | Phi Theta Kappa Honor Society | Highest Level Transfer Merit Scholarship
- **Relevant Coursework:** Algorithm Analysis & Design, Data Structures, Database Design, Artificial Intelligence, Operating Systems, Data Science.

PROFESSIONAL EXPERIENCE

Datatelligent – Glen Ellyn

JAN 2026 - PRESENT

ARTIFICIAL INTELLIGENCE INTERN

- **Architected a production-ready Intelligent Document Processing (IDP) pipeline** using Vision Language Models and Agentic Document Extraction (ADE) to automate parsing of complex PDFs; converted manual workflows into schema-validated JSON, increasing processing capacity by **80%**.
- **Engineered a Retrieval-Augmented Generation (RAG) system** using LangChain and Vector Databases to centralize firm-wide knowledge; optimized retrieval strategies to reduce information lookup time for consultants by **10+ hours/week**.
- **Developed an end-to-end LLMOps pipeline** with CircleCI, implementing automated model-graded evaluations and safety guardrails to prevent PII leakage and hallucinations in internal tools.
- **Designed and scaled a browser-automation lead-generation pipeline** (Claude in Chrome/Cowork) across nearly **1,000 higher-ed institutions**, matched against IPEDS data for a scored Growth target list
Prototyped multi-step AI Agents using Python and LCEL to automate report generation and ticket triage, replacing manual SharePoint-based notetaking with automated intelligence.

North Riverside Public Library - North Riverside

JAN 2024 – JAN 2026

CIRCULATION CLERK & TECH EXPERT

- **Resolved 95%+ of technological issues** for patrons by providing clear, user-friendly troubleshooting and solutions for diverse hardware and software challenges.
- **Managed the SWAN Library database** to optimize regional connectivity and enhance collaboration among Chicago suburban library systems.
- **Conducted tech assistance workshops** for Cantata Adult Life Services, delivering tailored support that achieved consistently high user satisfaction rates.

CERTIFICATIONS & CONTINUING EDUCATION

DeepLearning.AI

2026 - PRESENT

AI SOLUTIONS SPECIALIZED TRAINING

- Completed intensive coursework in LLMOps, LangChain Application Development, Production-Ready RAG, and Automated Testing for LLMs.
